Hamilton, OH 45011

Dear Members of Congress:

High gas prices are killing US~! I stopped at the gas station and only pumped 6.9 gallons and it cost almost \$25~! Everything has gone up in price because of the high price of fuel, especially groceries. If you think this country is in a recession now, what until we have to deal with the cost of heating our homes this winter. WAKE UP CONGRESS~! PLEASE allow offshore drilling and the exploration of alternative & renewable fuels before it is too late and we are in a depression~!

Sincerely,

Mary St. John,
